

Benign Essential Blepharospasm Research Foundation

MID YEAR FUNDRAISING APPEAL

EMPOWERING INSIGHT

WHERE DO YOU COME IN? Your donations support our research, education, and support initiatives. Your gift is fully tax-deductible.

BEBRF typically holds over fifty support group meetings a year in the US. We offer these meetings both in-person and virtually via Zoom.

RESEARCH

Since 1985, your generosity has fueled nearly \$3 million in groundbreaking research for insight into blepharospasm and related conditions. Your contributions empower researchers who desperately need your support.

Every year, an international audience gathers for the BEBRF Symposium, focused on expanding their understanding of blepharospasm.

SUPPORT

We are dedicated to empowering patients and caregivers through compassionate support. Your donation enables essential services such as support groups, coping resources, and doctor database referrals.

One BEBRF study resulted in botulinum toxin being approved by the FDA, and it remains the most effective form of treatment.

EDUCATION

At the heart of our mission lies education. Through scholarly articles, brochures, symposiums, and medical academies, we spread global awareness. Your support empowers individuals with the insights needed to navigate their journey.

THE CAUSE

Help us unravel the underlying cause of blepharospasm. Your contribution promotes research into the origins of this condition, empowering researchers with knowledge needed to develop interventions and preventive measures.

For dystonia and blepharospasm, finding the genes should lead to an understanding of the cause of the disorder.

Before surgery is recommended, patients are advised to try safe, nonsurgical therapy such as botulinum toxin injections.

THE TREATMENTS

Each donation brings hope and empowerment to those living with the condition and provides support for research, bringing new insights and breakthroughs in new treatment options.

THE CURE

Your donation fuels cutting-edge research efforts, providing resources to unlock the mysteries of this condition.

Together, we empower individuals with the insight that a cure is not just a dream but a tangible goal within reach.

While there is currently no definitive cure for blepharospasm, there is always hope for future breakthroughs.
